

My task is to create a portfolio focusing on HTML.

First i create a html in language tag this tag convey in english and put head tag and will create meta base tag in that tag viewport its mean in our output came in desktop mode in mobile also came that mobile size also so this tag will be used that place next i add title tag it gave title for this page.next create body tag in that body tag i create header tag and h1 tag it used for create a heading.next i used navigation tag this tag used navigate one page to another page in that we used attribute ta in that herf source also added heading tag and break tag it use for break the line and i use paragraph tag to create mail id and phone number

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <html>
4 <head>
5 <meta charset="UTF-8">
6 <meta name="viewport" content="width=device-width,initial-scale=1.0">
7 <title>Portfolio</title>
8 </head>
9 <body>
10 <header>
11 <h1>MY PORTFOLIO</h1>
12 </header>
13 <nav>
14 <a href="#">about</a>My Name is Syed Bilal S and i'm currently purduing my B.E mechanical engineering at mailam engineering college in villupuram.originally fom vill
